3 Grouping

To group data by a specific column, end-users can drag a header from the column header panel onto the group panel. The GridControl automatically sorts data groups in ascending order. To reverse the sort order, click the column header.

4 Column Header Context Menu

The column header context menu enables end-users to manipulate a column (apply sorting, grouping, calculate the best column width, etc.). The menu is activated by right-clicking a column header displayed in a header panel or in a group panel.
